

AUM

American University Of The Middle East

Date: May 23, 2024

To Whom It May Concern

I am writing this recommendation regarding Hassan Mahdi Behbahani Pour who was one of my students at the American University of the Middle East in Fall/2022. Hassan is highly recommended to pursue higher studies as he demonstrated unique and excellent skills particularly in courses of his field of study, and courses of practicum nature.

He is also known for his dedication and seriousness and was highly motivated towards reading and discussing thought-provoking issues in his field.

In view of his intellectual abilities and genuine motivation, I would strongly recommend Hassan for any academic and professional endeavor seeking these qualities in an individual.

Please feel free to contact me if you require any further information.

Sincerely,

Dr Ghaylen Laouini,
Associate Professor of Mathematics
American University of the Middle East
College of Engineering and Technology
